

The Future of Pharmacy in an AI-Powered World

NCPA 2024 Annual Convention and Expo
Columbus, Ohio

Speaker

Sean Jeffrey, PharmD, BCGP, FASCP, AGSF

Director of Pharmacy

Hartford Healthcare Integrated Care Partners

Disclosure Statement

Sean Jeffery has a financial interest with CVS Health and the relationships have been mitigated through peer review of this presentation. There are no relevant financial relationships with ACPE defined commercial interests for anyone else in control of the content of the activity.

Pharmacist and Technician Learning Objectives

1. Define key terms related to artificial intelligence including machine learning, natural language processing, and large language models.
2. Describe basic principles of how large language models and general AI models work and the potential applications of these models in clinical decision support and patient communication.
3. Demonstrate practical skills for using AI tools and tips for identifying potential biases in AI-generated information.
